

BAMBIX

BAMBIX
BLEEDING IN A BOX

BIOGRAPHY

How do you introduce a band like Bambix? We are tempted to say not at all as the three-piece from Nijmegen, Holland surely doesn't need any silly introductions any more. But just for the fun of it, here are some buzzwords for you: Punkrock, Energy, a charismatic female voice and great, great melodies is what Bambix is all about. Bambix certainly is one of the best female fronted punk outlets on this planet. Along with their fifth album to date "Bleeding in a Box" which will finally hit stores on February 18th the band managed to make another step forward. Songs about hypocrisy, tolerance, relationships and Tyra Banks who turns out to be a dog - they all capture the spirit that has always driven the band to keep doing what they're doing: "All the spirit that we got just by playing our songs, all the people that we met who would gladly sing along, gave us everything we wanted and sometimes even more". But listen for yourselves!
